

# Creating a New Club - AFO (Advocacy for others)

## Created by a Student Anonymously

Summary- The club will be more of a safe haven for students who have issues with advocacy in a whole because what is the point of sticking to just one point with a diverse group of people there is not gonna be more than one club so this club will be a support group for everyone and there problems with a community that can support them with there issues and get them the help they need in case they could use it. This club will be for students and teachers alike because just because there teachers does not mean they do not have problems so the supervisors of the club would be people who could also use help and with the help of a Ms.Akins as a head supervisor of the club we could get the help or just be a safe room for everyone to be in and feel like they have a place to be and a place where they belong.

### 3 Fundraisers-

**Krispy Kreme-** The Krispy Kreme company has had fundraisers with us before and when they did we made a decent amount of money.

**T-Shirt Sale-** It Would be easy to make a t-shirt or beanie/hat of sorts maybe even other articles of clothing but you could make said article for 15 dollars and sell them for 20 for a 5 dollar profit that will go to the club(May not work as well as food or other ideas but still can make an impact)

**Talent Show-** A talent show would be amazing for kids to express themselves and all you had to do was ask for the principal to allow to make an announcement and we could announce that the school would be having a talent show with judges(teachers who volunteer) if you are scored the highest you would be given the prize of around 40 dollars to more depending on how many contestants but to enter you must pay a 5 dollar entry fee so that we can still profit off the talent show.

Event to show what the club is about- we could host an assembly with a slide show showing a riddle on the screen which will lead them to a room where they will have to solve another riddle about advocacy so while using their brains and learning about advocacy and how it affects people they will also be enjoying themselves and remember it for a better reason than just a boring presentation and at the end of the riddle maze it will end at the club room which would be setup with brochures and different posters with facts about advocacy to teach and even a sign up sheet for anyone who learned something and thought that they would want to join. For the community we could always spread fliers around the town and hang them up in highly populated places like stewarts or outside of restaurants and somebody could go to the senior citizens home and teach them about it.
